

## Visiting in a Pandemic

I can have visitors now. These visitors might be:

- Mom and Dad or
- Relatives, like brother/s and sisters, aunts and uncles
- Other people, like my Passport worker or someone else

We are still in a pandemic. This means a virus can still be passed from one person to another. This also means there are rules to the visits. These rules help to keep people from passing the virus. They can help keep everyone healthy.

There are rules for my visitors and rules for me.

Here are the rules for my visitors.

- They have to get a virus check

- The virus check might say that they are OK. Then they can come to visit
- The virus check might say that they have the virus. Then they will have to stay away for a few weeks or more. This can help keep me virus-free

Here are the rules for me and our visits. These can help keep me virus-free too.

1. I can have one visit a week
2. Visits will be outside
3. My visitors will stand or sit far away from me
4. I have to wear a mask. My visitors have to wear a mask. This is very very important

These rules might change. My staff will tell me when they will change.
